

Early detection can make all the difference.

Think about it. Mammograms are the best way to find breast cancer early. And finding breast cancer early is the best way to survive it.

If you're 40 or over, it's time to start getting regular mammograms. Every two years until age 50. Then once a year after that. It's simple, safe and effective.

Call the MacNeal Breast Cancer Center to schedule your mammogram. (708) 783-9100
